

# IOS Programming Assessment

---

## Goal:

Write an app that scans all files on the iCloud drive and collects following information:

- Names and sizes of 10 biggest files
  - 5 most frequent file extensions (with their frequencies)
- 

## Functional Acceptance Criteria:

- This information should be displayed in a convenient way.
  - App allows the user to start and stop scanning.
  - The app must display progress of ongoing scan.
- 

## Technical Details:

- Accomplished project must be posted on Github for review.
- Swift should be used as the coding language.
- XCODE version should be 8 or newer
